# HOWARD HOSPITAL

Service of  
Dr. Larrach

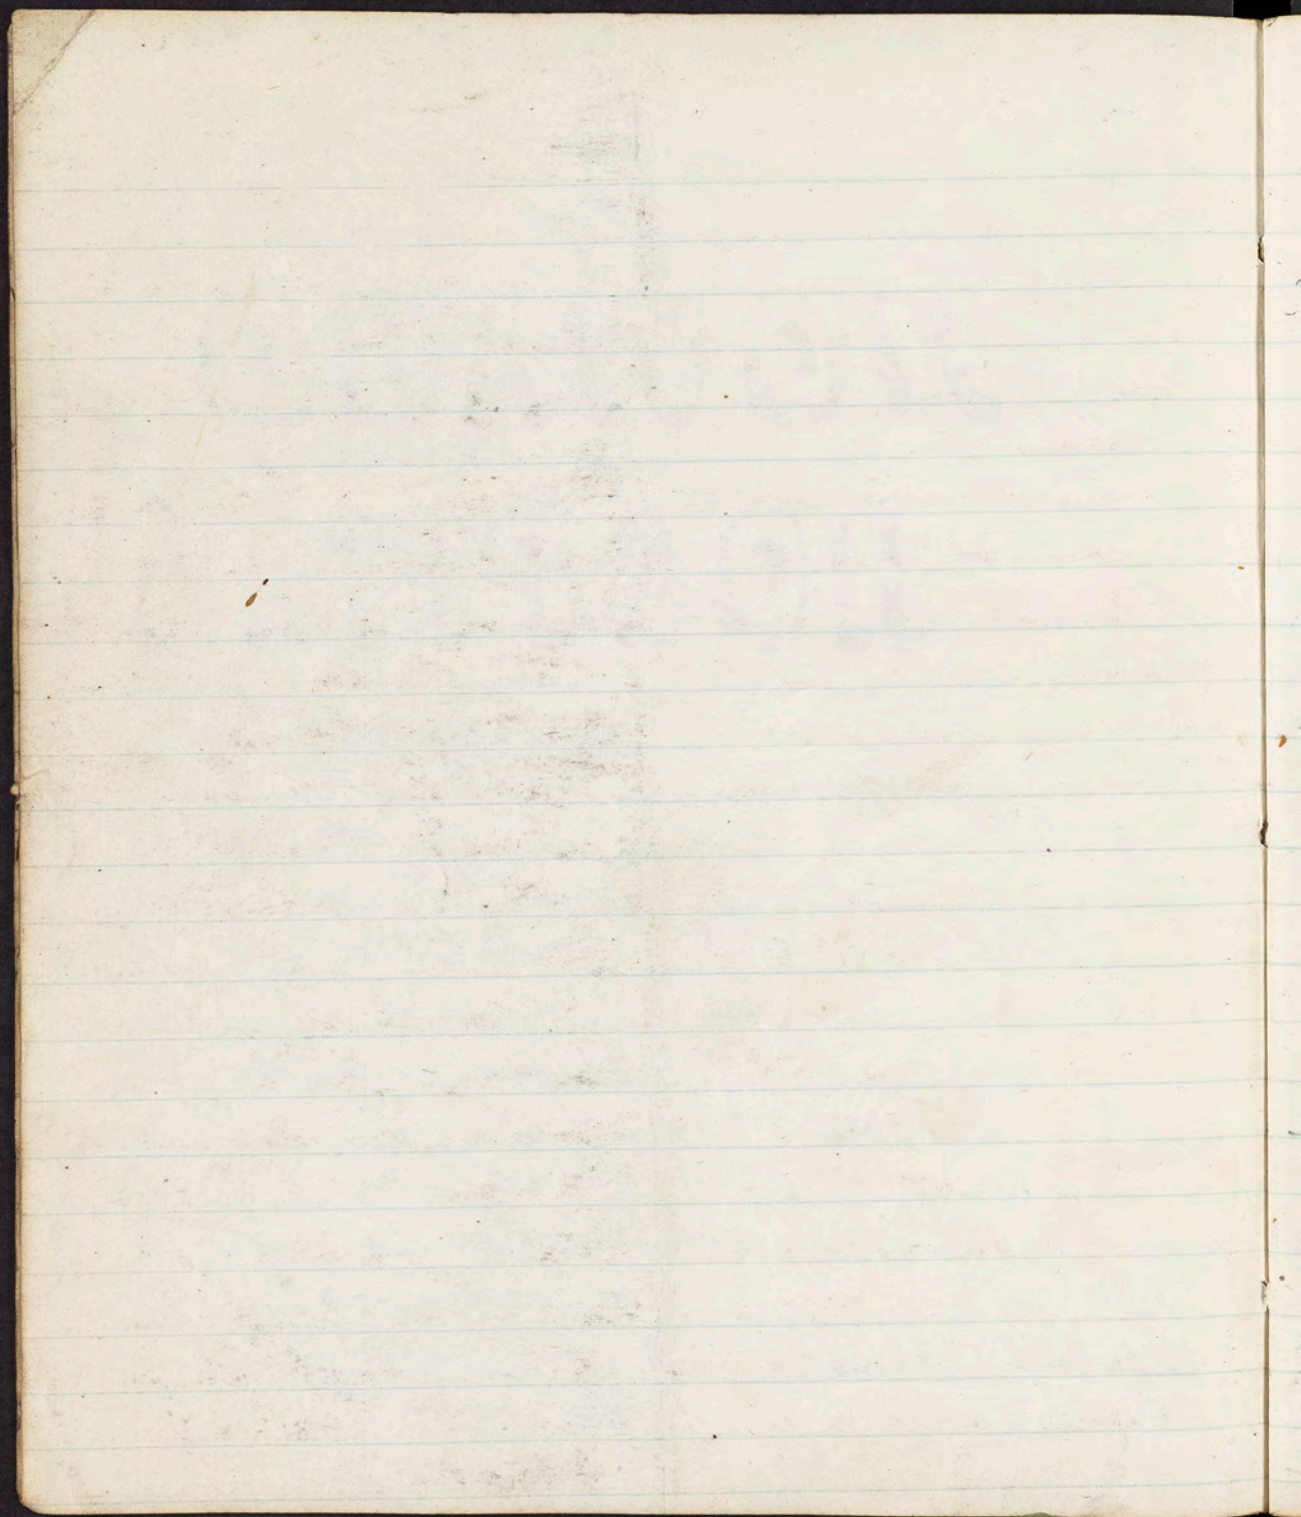

on

Febrile Diseases

Notes by

Prof. Williams

<sup>1850</sup>  
March 1st 1850

# Howard Hospital

March 2<sup>nd</sup> 1860

1. Jno McCabe. 32.

Bronchial & Spasmodic  
in fact, from asthma  
Pulse, regular, 72. Soft.  
Saw him

Brown's Angh Mixture

2. James McBoen. 31.

Pain in joints, an old  
standing matter, but  
freshened up by cold.

Better under Quinine  
& Dover's Powder

Same soft pulse of 72.  
Been worse & came to the  
Doctor 4 weeks ago. There  
is an evidence of the system  
being gone through,  
which lasts 20 days, &  
returns to normal pulse

Quinine was given to  
meet the general indica-  
-tion, of fever & constipa-  
-tion symptoms.

Dover's Powder given to  
meet the special indica-  
-tion of Rheumatism &  
pains.

My experience has been  
that Quinine aggr-  
-vates the power of Opium.  
His pains are in breast.

3. James Brown. 21.  
Cough. Mucous <sup>spasmodic</sup> sore. <sup>throat</sup>  
Chronic Bronchitis

Referred to Dr. Meigs.

4. Jas. Cunningham. 62.

Adama of leg. about  
ankle. Has had it for  
2 or 3 years in Summer  
but in Winter. Never so  
bad. Attributes it to  
sitting steadily. Beating  
of heart perceptible all  
over the chest in front  
& back.

*Lucas phlegmaticus* has  
 - permanent shadow in  
 appearance. Been sick  
 sailing for last 16 or 17  
 years. Character of sneezing  
 & feeling of pulse (strong  
 frequently) shows it is  
 not owing to fever, owing  
 to heart, which is the fountain  
 of whole system. History  
 shows preliminary touch. Going up  
 stairs, gets almost out of  
 breath. Liddings in hand.  
 not Valerian. Lycopodium  
 - dropping. deland  
 Ventricles, not arising from  
 fever, but from a want of  
 tone, adynamia, Altonia.  
 Want of vital contractility  
 that heart has yielded to  
 the force of blood. Give  
 him Iron. quinine. Take  
 away his fluids & food.

Give him every thing  
 to enrich his blood.  
 Epamin. Chlor. & you  
 will find it low. Some  
 nights passes 2 marks  
 very high colored, when  
 he passes so much.  
 Adama must be removed  
 by ordinary demulcents.

R.  
 Rutaria Iron Pills gr ij.  
 S. takes one an hour  
 after each meal.  
 Set 50 Pills.  
 Referred to Dr. Keig's  
 J. James Given. 1733  
 Ireland. 55.  
 Been sick 2 weeks.  
 Took Coels. Been supped.  
 Spit a little blood after  
 that been sick with  
 dysentery. has that  
 now.

This is case of fever,  
Epidemic. Bronchus  
This form of Epidemic  
Fever. Took it 1st in  
Bronchus then moved  
to the lungs

Influenza Broncho-Thrac.  
Let him have

Dr. Linn Suple 7j.

Morph. Suple 3j/4

~~S. Suple 3j/4~~

As to this

Pulv. Specac. 3j/4

St. Pil. No X.

O. one an hour before  
each meal & bedtime.

Live upon rice boiled  
in a jelly. Take a cup  
of tea & toast AM &  
P. M.

Lay out the towels  
a mustard plaster  
on nape. Then plaster  
bust, take off, clean out

In this recipe

Linnine to break up  
exacerbations of fever &

to meet general indications  
Specac. as a special "

Morph. to meet both  
indications & to aid both

Morphica & Linnine.

All indications are

either <sup>or after combining</sup> General or special.

1. Refers to General fever

2. " to Special organ  
affected.

Specac used lot in  
Dysentery by Van Helmont.

Stomach antispasmodic

to bowels. This directs

nervous action to stomach.

It is an emetic. Produces

emesis & the disease will

leave bowels. Atkinson

added Opium.

In the piece,  
Specac, Opium & Calomel

Specac acts on <sup>ad m</sup> ~~the~~ <sup>no</sup>

Opium stops Irritation

Calomel acts as Laxative, whose

secretions are always arrested.

They give Linnæus because

there is fever.

6. Mary M. Mary, 55

Chlorine Bronchitis with

Dyspepsia

Bcon. warning.

Not. Hæmorrh.

Has no appetite, had none

has none yet. Pain in heart,

headache Febry 28th.

R. Rub. Vinica gr. ii

H. Pil. No. 207

Not an an hour appearance  
meal

Referred to Dr. Meigs

End of this Clinic

Howard Hospital

Tuesday, March 6th/60

1. From Case. Her last  
Chlorine Bronchitis  
Deng. ~~Headache~~

R. Lycop. 3j.

Vin. Antimony 3j.

Trist. Digitalis 3jss

Trist. Op. 3j. x 5

Cough mixture

S. 4 Tasp. capsules a day.

Pulse, before 72, soft, regular,

now the same, but slow,

fuller, quick. (This

latter does not belong to fever,

it has something to do with

the heart)

Same with the addition

of 3j. of 3jss

Appetite better. Some sick

Eructus. Slight fever.

Take notice of Digitalis.

Come on Friday.

2. Christopher Goring, 1810  
Williams St. Ireland St.  
years old. Father.

Been sick

Very pale, striking symptoms.  
Pulse 84, absence of quivering,  
thrust, in antithesis to acute,  
Pallor of face, slight oedema  
of lower lids, venous trans-  
udation, Pallor around of  
Capillary blood. From the  
pallor of skin + oedema  
slow venous congestion, in  
the left Ventricle Chronic  
Hepatic congestion, therefore  
by reasoning back, must  
have had Hepatoma  
chills than Terrible Inter-  
mittent. Now for confir-  
ming this. He was not  
treated right. —

1. Been sick 2 years  
Chronic. Was in Gloucester  
then.

(Took Chills in Spring  
Ringuear. (a case proving  
that Venous chills are,  
not mere accidents proving  
that miasmas can be  
bit about in Spring as in  
Fall) Never had any chills  
before that. About beginning  
of August. Had a Terrible  
generally in P.M. at 2 P.M.  
Not very vigorous chills.  
Something like Malaria.  
Gave him Zinnine alone,  
until chills were stopped.  
Irregular Chronic Inter-  
mittent, as it has no  
time to come on. Will  
Zinnine do any good?  
Give him Fowler's solution  
R. Fowler's solution 3j  
S. Take 9th & 3 times a  
day.  
Urine, red, bright colored

James McCumley

11 years.

Been sick 3 weeks.

Complains of headache.

Worse every other day.

Cephalic vertigo. Insomniac.

Give him

R. Lin. l.eph.  $\mathfrak{z}\mathfrak{i}$

~~1. Ascorbic Acid~~  $\mathfrak{z}\mathfrak{i}$

Aqua

1. Taste teaspoonful 7 times a day  
taste no more but out need

gruel

Mary Macklin 6 years old

Cuba

R. Epidemic mixture

Bicarb. Soda  $\mathfrak{z}\mathfrak{i}$

Peppermint  $\mathfrak{z}\mathfrak{i}$

Vin. Antiseptic  $\mathfrak{z}\mathfrak{i}$

Speace  $\mathfrak{z}\mathfrak{i}$

Symp. l.eph.  $\mathfrak{z}\mathfrak{i}$

Aqua Mentha  $\mathfrak{z}\mathfrak{i}$

Aqua  $\mathfrak{z}\mathfrak{i}$

1. Taste Teaspoonful every 20 min

3 hrs. as it clears  
will keep him

R.

Brown mixture

Continue same  
treatment.

Harvard Hospital

March 9th 1860

From Case, New York

Pulse 72. Increased

Digitalis the last

time. Doesn't feel

any more dizzy

than before

Prescribe Digitalis

a  $\mathfrak{z}\mathfrak{i}$ , making  $\mathfrak{z}\mathfrak{i}\mathfrak{i}$

Want to get the

full force of the

Digitalis. She had

the usual dose.

Last May. Has been  
treated about 2 weeks,  
in proportion to the length  
of disease, will be the length  
of time for recovery.  
Continue treatment with  
the above increased

Christopher Goring, has  
on the 6th. <sup>chronic</sup> ~~irregular~~ <sup>intermittent</sup> ~~intermittent~~  
Been treating him with  
Fowler's Solution. Had a  
chill on the P.M. of the  
6th. none since. Did  
not have any chills since,  
although generally has  
them on damp days.  
Watch the action of  
the arsenic.

Continue treatment,  
giving it 4 times a day.  
5 drops.

## Arsenic

When introduced, was  
identified as anti-cancer.  
Washed cancerous ulcers  
& kept them clean &  
comfortable. Then was  
used in Cancer Uteri,  
where there was putrescence  
& found it very efficient  
in correcting stench.  
1st saw it in 1864  
in this use in Uteri  
Cancer. Since then used  
in Cancer itself especially  
Epithelial. Found that  
it would keep peritoneum  
lumpy, although the  
cancer would return  
locally, while it would  
prevent metastasis &  
get. 3. 2. 5. one case got  
well altogether after its  
use.

Arteries will be found exist especially for  
to be the remedy after the adults, that at the  
operations for Cancer, Pulse. elbow, for infants. Infe-  
When creases, numerous, Sin<sup>te</sup> - entirely there is another  
Relaxation, or Paragoric, along pulse, which is, the  
very few direct Diagonists force of the right  
Lumina &c &c are merely ventricle, which is the  
antipirous, Arteries go membrum of the right  
into the blood & radiate ventricle multiplied into  
1. Arteries Arteries its contained blood.  
2. But under Arteries & The 1st is the pulse of  
Compound Lumina pulse the greater circulation  
before Hepatic Arteries of this entire organism  
Pulse relates not to The 2nd, is the pulse  
Capillary, Venous system of the lesser circula-  
the pulse is the move- tion throughout the  
ment of the muscular lung. The one therefore  
force of left ventricle of is a pulse related to  
heart multipled into the Venous blood, the  
quantity of blood, can arter related to Arter-  
be found in said Arteries al blood. Red blood  
manifested to arteries in the general circulation  
on the calibre of any has impulse, in the Ar-  
Arteries. That at the terial system &

seen it in the venous  
while on the contrary  
in the superior circular  
arteries blood has  
impulse arteries seen  
it. The human  
heart is a compound  
organ related diagonally  
to a greater for left  
circulation, that is, the  
right auricle is related  
to the left ventricle, & the  
right ventricle is related  
to the left auricle. So  
much for pulse. Further  
this cordal impulse  
manifested in arteries  
is acute or obscure. We  
therefore have an acute &  
an obscure pulse. Since  
is abandoned as an  
unscientific word.

Again, this impulse  
is repeated more or less  
frequently per minute. This  
called frequency of pulse.  
If many per minute, it  
is termed a Frequent pulse.  
If few, it is termed a slow  
pulse. Here then scientifically  
we can raise 2 other  
appellations, viz. 'Frequent pulse'  
do

Further remarks upon  
1 & 2 I defer until another  
opportunity.

In the General circulation  
we recognize 3 distinct  
systems, 'Arterial', 'Capillary'  
& 'Venous'. The quantity  
of blood proportionally  
in these systems, may be  
in due healthy proportions  
or they may be in an un-healthy  
disproportioned and  
debilitated, hence the term

equalizing the circulation  
- line & another phrase  
- an unbalanced condition  
- of the circulation

For example, in the  
- evolution of the human  
- system, there is a  
- natural, healthy, over-

- charge of blood in the  
- capillary system, hence  
- arthritis, the red skin.  
- In childhood, the  
- organs are engorged, or those  
- of the cheek & coral tip.

- In old age, in the  
- extremities of the  
- body, there

- is an overcharge of blood  
- in the venous system, hence

- venous apoplexy & various  
- forms of venous stagnation

- happens in old age. In  
- full & vigorous

- blood, the 3 systems  
- are in a state of balance

During <sup>night</sup> day, there  
- is an overcharge of venous  
- blood. During day, an over-  
- charge of capillary  
- blood. The consequence  
- of this diversity

- In Endemic, there  
- is a

- diminution of  
- the protoplasm,

- the venous system  
- is engorged, or those

- of the cheek & coral tip.  
- In old age, in the

- extremities of the  
- body, there

- is an overcharge of blood  
- in the venous system, hence

- venous apoplexy & various  
- forms of venous stagnation

- happens in old age. In  
- full & vigorous

- blood, the 3 systems  
- are in a state of balance

During the hot or  
febrile stage of the  
Paratyphoid, the engorgement  
of blood beyond what is normal exists  
in arterial system, in  
consequence of which the  
cellulae of artery is  
large, the tube is in  
a state of spasm.

When a large quantity  
of blood is passing  
in arteries, there is  
3 additional oscillations  
viz. 1. Large pulse  
2. Dilated do  
3. Full do

Again, the nervous  
system is sometimes  
in what stage, called,  
the toxic state, & then  
this imparts to arterial  
tube false left  
ventricle, into fullest

degree, the property  
of contractility, when  
this vital contractility  
exists in the hot stage  
of Epidemic Fever, it  
produces a hard  
pulse. If this has  
gone to yet greater  
degree, so as to con-

tract the tube, it  
is called a corded  
pulse. If the degree  
of toxic, sthenic  
state is still greater  
it gives yet further  
vital contractility  
which it produces

The oppressed pulse,  
trickling down in a small  
black stream.

N.B. This oppressed  
pulse is as small as  
the contracted pulse  
of chill frequency  
still to distinguish

one from other.

During this Oppression  
pulse no medicine  
will act on mucous &  
dermal surfaces. The  
system is locked up  
& mischief is going  
on. Transudation

Exudation - Inflammation  
of serous surfaces full medicine  
cures become instant.

There is but one remedy  
& that is instant blood  
letting at last the  
blood from vein  
will trickle feebly

in surges, rebounds.  
The stream becomes  
parabolic. Arterial  
blood yet more &  
the stream becomes  
yet more arterial

blood hotter for  
a direct line,  
forming honey  
in the blood. The  
patient cries out  
with satisfaction  
Oh what Relief,  
I am liberated

Howard Hopkins  
Friday, March 18th 1880  
Dr. Sarrach

Chief. James M. Jones  
I was old. I had 4 tubes.  
Upper glands are swollen  
whe cut generally.  
Cut them for 2 reasons  
1. To relieve capillary  
congestion. 2. To

relieve stricture.  
Convolutions are disappearing  
not excruciating. The best  
I ever should not cut out  
these to find, because  
the nervous organism  
is directly exposed, &

the heat is increasing,  
they will faint. When  
to the front, the Ganglion  
system is exposed, but  
it is deep & not much  
affected. Warmth to the  
abdomen & chest is ac-  
ceptable. J

Remedy is to give Hoffman's  
Anodyne gr. ii + Ether gr. i.

Child vomited all night  
from 20' CLK. This vomiting  
at M. Night to be looked into.  
Many cases of Scallabies  
commence at midnight.  
Always feel pulse of child  
at elbow. Pulse here is  
quiet, frequent, full.  
Therefore not an Essential  
fever unmarked with it.  
Throat not sore. Throats  
Anxiety cold.

Re. Species. Vini  
S. Give gr. ii. If it  
vomits give gr. ii in  
two hours, & so on to  
ii.

Ephemeris  
Edwin M. Oliver  
Case of Irregular Inter-  
mittent fever infantile.  
Give it.

Re. Annum. Capri. keep  
S. gr. ii 3 times a day,  
in powdered water  
told better. So on until  
cure secured.

Theresa M. Oliver  
Epidermic fever.  
Give gr. ii every 2  
hours. Did not make  
sick. So on with remedy  
until child is deeply  
nursed.

Van Helmont bro't  
Species into Practice  
in France, afterwards  
in England. In use of  
Dysentery, then by Dantrolin  
in dyspepsia, then by  
the French, who have  
written a large book  
Species has a certain  
good influence from  
Cathart to surfact

Mother of that died  
Pulse 84, 12 bpm.  
Throat hurts, tongue  
tongue, white, which is  
dead epithelium. Jordan  
described this. Also  
there is ~~Acetone~~ <sup>Acetone</sup> of fumes, which  
plainly seen. So on with  
same remedy, until  
next Tuesday.

Tuesday March 20th/60  
From Case, Chronic Bronchitis  
Dose 1/3 of Juice. Digitalis  
<sup>has been 3 times a day.</sup>  
Pulse, full, slow, soft. The  
effect of Digitalis, Been rising

No Nervous congestion, but the  
Circulation is equalized. Digitalis  
takes away irritations, & in doing  
all this must have an influence  
over the organ, principally con-  
cerned. This blood poured into a  
very delicate organ if there be  
disease in the lungs, it will  
be sustained by the irritation  
of congested blood. It is good  
as blood-letting, however. Cough  
is better. But not much  
benefited. Doesn't spit as much  
or on with treatment. Very  
cough. Take little Senega  
after Magnesia. for this. Come  
on Friday

Case of Dropsy <sup>Rogers & Turner</sup>  
appetite good, bowels  
regular. This not a  
sequela

Case of General Dropsy

Never had catarrh or  
any inflammation at all of  
digestive system.  
Cheeks flabby & swollen  
papae water freely.  
Abdomen flabby & on  
lappening & pericardium of  
along a presence of stone

Water in the Cavity also  
 effervescing, sounds like it  
 on Auscultation of chest,  
 here dulced breathing, coarse  
 sound, prolonged. Whole  
 body swollen, over the heart,  
 has the "Neutrotic Tink"  
 on listening in small of  
 back a Rouches.

Dropsy from heart disease,  
 What specific form of  
 heart disease causes this?  
 Dilatation of the Aorta,  
 here. Want of Contractility  
 of the Ventricle.

Chronic Bronchitis  
 Coughs run thinner  
sometimes shows up  
same as he spits,  
appears as if it comes  
from stomach

done in stomach & tongue  
slightly turned.

To an irish same  
and Cornish Friendly.

Dropsy. etiology of  
Is a result of Renal  
Dist Ferr, owing to  
a transfer of disease  
to the capsuled Gleason  
transudation of fibrin  
into it, obliteration of  
the ducts biliary. Also  
involving hepatic artery.  
Thus brings about  
not nuclei liver, from  
of Crosis. In consequence  
of this, Portal system is  
necessitated to  
transuded into  
effluvia vessels, hence  
Ascites, Anasarca &  
are sequela of  
the Irish Beer

Remedy Culicoid & Sabrinum  
& topping the retic.  
In contrast with this  
there is a Dropsy from  
Epidemic Fever.

Influenza, Acute, Scarlatina,  
Rubella, Erysipella. Canst  
recall seeing it after  
Linnae Pap, common  
to 1st 3. however. It  
appears 1st swelling  
of feet, Anasarca,  
always involving  
genitals, even to an-  
-last urination

This I have seen pass  
into General Dropsy  
swelling whole body  
like this Clized.  
Urine, Chimney examination,  
loaded with Albumen  
Under Microscope  
find tubes. These  
tubes are transuded

fibrin on surface of  
the Tubed Urinifer  
which by irritation,  
particularly in pus cells,  
on the adherent surface,  
become thickly detached  
+ roll off + float out  
with the urine this

form of dropsy is most to muscular fibres of  
admirably reservatively heart. To these may  
be treated by Elaterium.

I had such a case, smelt a fluid subaqueous  
asp. most enormously,  
+ under Elaterium gr<sup>ss</sup>/16  
water poured forth.

Lawther in consuetudine

where gr<sup>ss</sup>/40 was

sufficient 4 times daily

a 3rd form of Dropsy

is caused by an  
enlargement of heart,

by dilatation as  
in case before us

Essential disease  
is lost Vital Contract-  
ility. Remedy is  
Cochineum to arouse  
heart's action + to  
produce hydrogen  
stools + Mercurius  
to restore contractility

to muscular fibres of  
heart. To these may  
be <sup>added</sup> Digitalis +  
a fluid subaqueous  
diets, dry diets.

For additional  
information read  
Hope on heart +  
make a Bibliography  
of diseases of heart.

Howard Hoopes  
April 17th 1860  
Colchicum.

Care of Rosanna James  
General Dropsy.  
Giving gr.  $\frac{1}{8}$  to  $\frac{1}{4}$  times  
a day. + Nux Vomica  
gr.  $\frac{1}{8}$   
Colchicum.

There are certain medicines  
which are given

Nux Vomica given two  
hours after meals, because  
it is a Nerving & because  
it is in order the blood in  
the other nutrient ma-  
teries, & to remove the  
Asthmic state of the  
Stomach. Now to give  
proper strength to the  
Stomach in the

peristaltic action of it  
give the N. V. when  
this Asthmia is false  
as in this lady's  
cases up the action  
seems to give off the  
different layers of the  
lining of the stomach. This  
is the action of N. V. at  
two hours after meals &  
at bedtime in gr.  $\frac{1}{8}$  day

Colchicum & N. V.  
not together

C. will at 1st have  
apparently no effect.  
Then there will be a  
reduction of pulse,  
then a diarrhoea.

Has a sedative  
effect over the heart &  
will produce a  
Hypnotic effect.  
When in good it has good  
effect

feels sick, all referable  
to stomach. When she  
crosses any distance  
heart palpitates, all  
from stomach. Has it  
never after meals & food  
and all affected after  
breakfast. Married.  
Harsh day, bowels constipated,  
2nd tried, to use old  
Coffee A.M. M & P.M.  
Pulse soft, eyes painful  
Dyspepsia. Baby  
sucks during night &  
does not get refreshment.  
Drinks no coffee at night  
& sleep all bad habits

James Ramsey

Been sick since last  
August. Want of Cyell  
-lay action in stomach. There  
is a want of force, a  
Centripetal force. If the  
lip is white, the stomach  
is red & vice versa. The  
Ald of nose show that  
there is nothing wrong  
with cheek. Eyes will  
tell the secret of the system.  
They are all right. Ears  
right. Sometimes a want  
of memory. Bowels are  
irregular, Laborer.  
How is your? Married.  
Scotts Irishman.  
Soft full pulse. St.  
No irritation. I find  
condition. When you  
find a person with  
fixed condition

Has a headache. Had  
chills last August. Got  
sick lost appetite. Got  
scurvy then. Felt very  
sore in Abdomen.

Came here complaining  
of vomiting <sup>of blood</sup> & pain in  
epigastrium. Throwing up  
a great, 3 quarts. Pain  
very severe. Sequela of  
Intermittent Fever. Chronic  
sequela of Endemic Fever.

Saturday.

May B. Williamson.

9 years.

Throat much

swollen

Epidemic Fever

Rf. Zinnias as before  
in Case 3.

Assam Madison.

Continue treatment  
Great deal better.

Harvard Hospital

April 27/60

Friday. P.M.

Mrs Margaret Hall

Epidemic Fever.

Throat much angulated.

Face less G.

Symptoms Antirheumatic

Sulph. Iodophor

S. one Pil. 4 times daily.

Rheumatism also, & dropsy in  
right leg, & in right hip

I have noticed in regard

to dropsy, the following

one sister in a family had  
one dropsy on one side of  
the body, while the brother  
had it on the other side.

Has had these Rheumatic  
pains many years. Has  
had 10 children. Always  
got well quickly. Always  
used to carry big burdens  
from market and all

the children on right side.

Has had great pain in passing  
water & very little at a time.

Also Incubation. Has it now.

So on with same treatment  
until next Tuesday.

James Gorham

Continued Epidemic Fever  
Remarkable pulse below 60.

Has him 5 grs of Cast. of  
Armenia 4 times daily  
an hour before meals & at  
bedtime.

Pulse now very intermittent  
changeable. between 44 &  
60. Looks better.

Face indicates condition of  
special sections and organs  
of human body, but it  
can tell the condition  
of the blood system  
Eye pneumonia ear

The proper centrum. low  
stomach flings, Mucous of  
the stomach bowels. If  
there be fever, face shows  
a centrifugal condition of  
the capillaries.

Absence of the capillary  
allows the  
dyspeptic stains on  
face, very marked when  
white this is going on, the  
natural lines of chin &c.  
are prevailing, as are the  
lines, across grooves where  
there is no stain & mark  
when there is no capillary  
- my circulation. Having  
back this circulation  
in fever, the infection, there  
is face of cheeks, but stage  
& receding stage & in  
the apyrexia.

On 1st week of typhoid  
fever, face is very pale

When pulse is very  
frequent. On 2nd  
week, better, when the  
capillaries are up.

If to all the signs,  
add microscopic  
& tongue & face, the  
former of diagnosis will  
be better.

If pulse is very  
frequent, weak and  
faint are abundant.

This pulse more for  
infection, but still  
more abdominal tongue  
good, capillaries acting  
well. In an acute case  
medicine & course  
Tuesday

Howard Hospital

Susan Madigan.

Little child.

Palm of hand cool

Took no more medicine  
until Tuesday

Took Typhoid.

Capitulum of Hand.

Sign of child's fever  
Arms of Endure

Said the heat of  
a child's hand in  
infantile life is

distinct every child  
in fever has it. If there  
is a heat need not  
feel pulse. That will  
tell.

Why is it? Generally  
circumscribed  
about size of 25 pices

There are 2 palmar arches  
above & below. There is going  
to be an 3 arteries.

Compare the amt of  
blood circulating  
in face of brain with  
the palmar arches. Which  
is the greater amount?  
Never made it.

In fever ought to have  
heat in feet & hands  
in Cephalic fever, ought  
to apply counter-  
irritants to these places  
in feet & hands.

Biddy Timmons

Flashes of heat & shivering

Friday, Sept. 29th 18th May Dr. McDanach  
History of Typh in this country

Whilst lecturing on Theory & Practice of Medicine in Penna College  
I read in Brachmann's *Art of Typh* prepos of St. Thomas's  
on their therap. agency new & candid and satisfactory, that I  
determined to introduce it into my practice and promised the class to  
have the preps. made by one of our Philade druggists. At the  
same time, stated to the class my predilection for this combi-  
- nation of the Yell. of of St. with  $\text{CaO}, \text{PO}_5$ , relying on the un-  
- satisfactory knowledge of the use of Antimony by the monks, who as  
alchemists, used it, we arrive at the time & name of Dietrich. It  
seems that he used a salt of St. with much success, which obtained  
for him an extraordinary reputation. Subsequently we have a  
most popular form of it under the name of James's Powder. It  
possessed remarkable febrifuge power, but it was irregular in its action.  
Fordyce substituted Tartar of St., as the great relaxant, and thereby  
capable of bringing about an early artificial crisis. The objection  
to this was its great liability to irritate the mucous membrane  
and to be less a febrifuge than James's Powder. Typh has adopted  
the oxide of Antimony in combination with  $\text{CaO}, \text{PO}_5$ . This is uniform  
in its action & is to be preferred to Pulv. Jacobi. It does not irritate  
the mucous surface, and therefore to be preferred to Tartar of St.,  
It may therefore be given with impunity in Stomachic cases.  
It is a great relaxant, and must be preferred therefore to

all other forms of Anthrax. Such was the amount of my  
remarks to the Medical class with a promise to exhibit the  
article to them on a subsequent year, this however owing  
to procrastination was never done. It was after I had ceased  
my labours there that I called upon Wm Hodgson Jr. to make  
me the preps. according to the statement in Braithwaite's  
Accordingly in the course of a few weeks, he presented me  
a Mixture of Sbr. and Cal, P<sub>o</sub>, and the due combinations of  
these to form his powders No 1. & 2. Here then is the history  
of the introduction of said preps into the United States. Since  
then I have used it to my entire satisfaction and from my  
urgency it has been subsequently <sup>used</sup> by many practitioners  
but as yet has not obtained its position as a conventional  
remedy. After several years use of it, I am prepared to  
give the following report: viz. 1. I use it in all the exan-  
- themata, and in the various forms of Influenza.

There is a very simple  
remedy: (The Disturbance  
is owing to action of  
the atmosphere upon the  
Abnormal Vascular  
Skin. If this Skin be  
separated from the  
atmosphere, the Symp-  
-tomatic Fever will

greatly abate; This means  
to get the patient to a purified  
Land, scented with  
oil of Rose, smeared  
over whole body constantly  
The patient is no longer  
fickled & reckless to

madness by evening Pock, but  
feels exposed & deep  
Fappetite & more than

Thus, the atmosphere  
of the room, which was a  
stench in the nostrils of  
nurse & physician &  
which foul <sup>atmosphere</sup>  
breathed has now the delight

& fragrance of a Rose bed  
I believe the Contagion  
is <sup>in this case</sup> already arrested.

There is a 2nd crop of  
Eruptions, which also  
will give its own  
Sympathetic constitution  
of excitement, but in  
itself is unimportant

Temperature of Room  
should be that proper  
for a healthy individual  
Pleasant drinks to quench

Expectorants to remove  
the collected secretion of  
fauces, should be admin-  
-istered.

Special  
there is another indica-  
-tion viz, to prevent  
fistula of pock. This is  
upon face. It is owing  
to fact that Pock on the  
face is not to come

fast to disappear, not the spheroidal form  
in regard to the develop ~~ment~~ <sup>ment</sup> of  
-ment of pock itself, but I as an adjunct  
owing to vascularity of <sup>to this measure</sup> ~~the~~ <sup>part</sup> the  
skin of face & these <sup>exclusive</sup> face, as in  
sympathetic crusts. <sup>Empyemas & these</sup>  
abscesses, the ~~most~~ <sup>most</sup> the areola. It  
if come in dense tubes would not matter  
on an ulcerated stage much that the face  
The pit is therefore of mean so be pitted  
not owing to varicose but would be discredit-  
but to the able to practitioners  
sympathetic. who has a beautiful  
woman under his  
care to have her  
thus married, & who

And as you  
chafe this, you keep  
pitting. I T. would  
not land the face, but  
at an early period  
adopt a suckling  
process in vulgar parlance.  
I would use a needle  
piece each pock on the  
face & press out the  
fluid & would not suffer  
it thereby to become

Doctor's Office  
 March 20/66 9 P.M.

There are 4 Great Eastern  
 Mice, *Sciurus*, *Sciurus*, *Sciurus*  
 1st & 2nd species  
 1st species of *Sciurus* 1st  
 2nd species of *Sciurus* 1st  
 3rd species of *Sciurus* 1st  
 4th species of *Sciurus* 1st  
 5th species of *Sciurus* 1st  
 6th species of *Sciurus* 1st  
 7th species of *Sciurus* 1st  
 8th species of *Sciurus* 1st  
 9th species of *Sciurus* 1st  
 10th species of *Sciurus* 1st  
 11th species of *Sciurus* 1st  
 12th species of *Sciurus* 1st  
 13th species of *Sciurus* 1st  
 14th species of *Sciurus* 1st  
 15th species of *Sciurus* 1st  
 16th species of *Sciurus* 1st  
 17th species of *Sciurus* 1st  
 18th species of *Sciurus* 1st  
 19th species of *Sciurus* 1st  
 20th species of *Sciurus* 1st  
 21st species of *Sciurus* 1st  
 22nd species of *Sciurus* 1st  
 23rd species of *Sciurus* 1st  
 24th species of *Sciurus* 1st  
 25th species of *Sciurus* 1st  
 26th species of *Sciurus* 1st  
 27th species of *Sciurus* 1st  
 28th species of *Sciurus* 1st  
 29th species of *Sciurus* 1st  
 30th species of *Sciurus* 1st  
 31st species of *Sciurus* 1st  
 32nd species of *Sciurus* 1st  
 33rd species of *Sciurus* 1st  
 34th species of *Sciurus* 1st  
 35th species of *Sciurus* 1st  
 36th species of *Sciurus* 1st  
 37th species of *Sciurus* 1st  
 38th species of *Sciurus* 1st  
 39th species of *Sciurus* 1st  
 40th species of *Sciurus* 1st  
 41st species of *Sciurus* 1st  
 42nd species of *Sciurus* 1st  
 43rd species of *Sciurus* 1st  
 44th species of *Sciurus* 1st  
 45th species of *Sciurus* 1st  
 46th species of *Sciurus* 1st  
 47th species of *Sciurus* 1st  
 48th species of *Sciurus* 1st  
 49th species of *Sciurus* 1st  
 50th species of *Sciurus* 1st  
 51st species of *Sciurus* 1st  
 52nd species of *Sciurus* 1st  
 53rd species of *Sciurus* 1st  
 54th species of *Sciurus* 1st  
 55th species of *Sciurus* 1st  
 56th species of *Sciurus* 1st  
 57th species of *Sciurus* 1st  
 58th species of *Sciurus* 1st  
 59th species of *Sciurus* 1st  
 60th species of *Sciurus* 1st  
 61st species of *Sciurus* 1st  
 62nd species of *Sciurus* 1st  
 63rd species of *Sciurus* 1st  
 64th species of *Sciurus* 1st  
 65th species of *Sciurus* 1st  
 66th species of *Sciurus* 1st  
 67th species of *Sciurus* 1st  
 68th species of *Sciurus* 1st  
 69th species of *Sciurus* 1st  
 70th species of *Sciurus* 1st  
 71st species of *Sciurus* 1st  
 72nd species of *Sciurus* 1st  
 73rd species of *Sciurus* 1st  
 74th species of *Sciurus* 1st  
 75th species of *Sciurus* 1st  
 76th species of *Sciurus* 1st  
 77th species of *Sciurus* 1st  
 78th species of *Sciurus* 1st  
 79th species of *Sciurus* 1st  
 80th species of *Sciurus* 1st  
 81st species of *Sciurus* 1st  
 82nd species of *Sciurus* 1st  
 83rd species of *Sciurus* 1st  
 84th species of *Sciurus* 1st  
 85th species of *Sciurus* 1st  
 86th species of *Sciurus* 1st  
 87th species of *Sciurus* 1st  
 88th species of *Sciurus* 1st  
 89th species of *Sciurus* 1st  
 90th species of *Sciurus* 1st  
 91st species of *Sciurus* 1st  
 92nd species of *Sciurus* 1st  
 93rd species of *Sciurus* 1st  
 94th species of *Sciurus* 1st  
 95th species of *Sciurus* 1st  
 96th species of *Sciurus* 1st  
 97th species of *Sciurus* 1st  
 98th species of *Sciurus* 1st  
 99th species of *Sciurus* 1st  
 100th species of *Sciurus* 1st
